

```

8      },
9    });
10  });
11  };

```

turns a promise object.

```

1  const axios = require('axios').default;
2  const connectToURL=(url)=>{
3    const req=axios.get(url);
4    console.log(req);
5    req.then(resp=>{
6      console.log("Fulfilled");
7      console.log(resp.data);
8    })
9    .catch(err=>{
10     console.log("Rejected");
11   });
12  }
13  connectToURL('valid-url')
14  connectToURL('invalid-url')

```
